Unfold your potential

No tools needed

A truss system like this has never been seen before! Not only it is foldable, - it's made in composite, - and even in a nice design!

There is more! Not only has the narrow simplicity of nature's own strongest engineering been used in the strongest way something light can possibly be made. - It is the combination of all above that sets a whole new standard in all the markets it is going to influence...

We are proud to introduce a world premiere; the product called TRUSSwire® - 20 x 20 cm profiles, able to be transported entirely flat, - with a free span of up to 8 meters possible! In other words: This is exactly what you need when size really matters...
